

# FRAME

**Manufacturing light and strong  
aluminum alloy (Al6061)!**

**Flier centered design!**

**Easy Disassembly and assembly!**

**Easy loading on a vehicle by 5  
stage separation!**

Frame is manufactured by aluminum alloy (Al6061). With flier centered design, disassembly and assembly are easy and transference is effortless. With light weight and minimum external shock, it will provide safe and comfortable flying experiences for all fliers.

In addition, it can be easily mounted on a vehicle through 5 stage separation so that customers can fly safely and comfortably anywhere they want.
